Dependable, Cost-effective Audio conferencing

Resolve's first-class teleconferencing services are consistent, dependable and cost-effective. Our three levels of service address your unique meeting needs:

On-Demand

No reservations, no restrictions. Conduct teleconferences whenever you please: there is no need to specify the duration or number of participants. Launch a call any day any time. Your unique passcodes are available when you need to execute a conference call.

Live-Operator Assisted

Enhance your audio conference with a live operator to greet your participants personally as they dial in. Or, if you prefer, Resolve can dial out to your participants. Resolve can connect just a few participants, or hundreds depending on your needs. See the difference a personal greeting and hassle-free dial-out service will make for your next conference call.

Full Service

Critical calls require that extra personal touch. A live operator is available throughout your conference to assist both moderators and participants. Focus your attention on the executives and stakeholders while we manage your call from behind the scenes.
